

Dear Parents, Guardians and School Community Members:

I hope this issue finds you enjoying your summer and spending time with your families and friends. This past year has given us much to celebrate in the way of student and staff accomplishments. Included in this issue are some highlights. For a more comprehensive list, please visit our website.

On June 24, we wished our graduating class all the best as they now endeavor into the next phase of their lives. We are fortunate to have had the past 13 years with them and know they are prepared to take on what lies ahead. We look forward to hearing about their future successes and sharing them in future issues.

The end of a school year also brings with it the celebration of those who now enter into retirement (complete list on page 4). We wish all our retirees good health and much happiness and thank them for their many years of dedicated service. They leave our district a better place having given so much of themselves to it. Congratulations!

As is customary, our summer is being spent preparing for the upcoming school year. This year is certainly no exception. In addition to our typical custodial and maintenance work, our capital project continues, with much to be done this summer including asbestos abatement, completion of the press box, and work on the high school courtyard to name a few. As a result, building accessibility may be limited to members of the community. Please call ahead if you plan to come by any of our schools for hours of operation and office locations as some have been temporarily relocated for the summer. We appreciate your patience and have done our best to minimize disruptions.

Thank you for your continued support of our school district. Your overwhelming support of our budget and propositions keeps us on a path of continued success in pursuit of our mission. Together, we can accomplish so much!

Enjoy the remainder of your summer and please read on and learn about the many amazing accomplishments of our students, staff, and graduates.

Sincerely,

Brian K. Bellair

Superintendent of Schools
